## What is the Pokémon Trading Card Game?

At its heart, the Pokémon TCG is a strategic card game where two or more players battle using decks of cards. Each player takes on the role of a Pokémon Trainer, commanding a team of Pokémon to defeat their opponent's Pokémon. The goal is to be the first to win six Prize cards by knocking out your opponent's Pokémon. It's a game of resource management, tactical decisions, and a sprinkle of luck.

## The Essential Components of the Pokémon TCG

Before we dive into the actual gameplay, let's get acquainted with the key players (the cards themselves!):

## Understanding the Anatomy of a Pokémon Card

Every Pokémon card has a unique set of features that are crucial to understand. Let's break them down:

- \* **Card Name:** This is the name of the Pokémon or Trainer card.
- \* **HP (Hit Points):** This number indicates how much damage a Pokémon can take before being knocked out. Higher HP generally means a more resilient Pokémon.
- \* **Pokémon Type:** Pokémon have elemental types (like Fire, Water, Grass, Lightning, Psychic, Fighting, Darkness, Metal, Fairy, Dragon, and Colorless). These types are super important for understanding weaknesses and resistances.
- \* **Evolution Stage:** Cards will indicate if they are a Basic Pokémon, a Stage 1 Pokémon (which evolves from a Basic), or a Stage 2 Pokémon (which evolves from a Stage 1).
- \* **Attacks:** This is where the action happens! Pokémon have attacks that cost Energy and deal damage. Each attack has a name, an Energy cost, a description of its effect, and the amount of damage it deals.
- \* **Weakness and Resistance:** Most Pokémon have a Weakness (usually double damage taken) and sometimes a Resistance (damage reduced) against specific types. This adds a strategic layer to team building.
- \* **Retreat Cost:** This is the number of Energy cards you need to discard from your Pokémon to move it from the Active spot to the Bench.

**\*\*Artist and Set Symbol:\*\*** These indicate who drew the art and which expansion the card belongs to.

## **The Different Types of Cards in a Deck**

A standard Pokémon TCG deck consists of three main types of cards: \* **\*\*Pokémon Cards:\*\*** These are your main attackers and defenders. They come in various forms, from Basic Pokémon to powerful Pokémon V, VMAX, and VSTAR cards, each with unique abilities and attacks. \* **\*\*Energy Cards:\*\*** These are the fuel for your Pokémon's attacks. There are two main types: \* **\*\*Basic Energy:\*\*** These represent the six elemental types (Grass, Fire, Water, Lightning, Psychic, Fighting). \* **\*\*Special Energy:\*\*** These have unique effects and can sometimes provide multiple types of energy or have other beneficial abilities. \* **\*\*Trainer Cards:\*\*** These cards represent items, supporters, and stadiums that offer various advantages. \* **\*\*Item Cards:\*\*** These can be played at any time during your turn for immediate effects (e.g., drawing cards, searching your deck). \* **\*\*Supporter Cards:\*\*** These offer more powerful effects than Item cards but can only be played one per turn. They often involve drawing cards, searching for specific Pokémon, or disrupting your opponent. \* **\*\*Stadium Cards:\*\*** These affect both players and remain in play until another Stadium card is played.

## **Setting Up for Your First Pokémon Battle**

Alright, you've got your cards, you understand what they do. Now, let's get ready to play!

## **Building Your Pokémon Deck: The Foundation of Victory**

Before you can battle, you need a deck. A standard Pokémon TCG deck must have exactly 60 cards. Here's a general guideline for building a balanced deck: \* **\*\*Pokémon (15-20 cards):\*\*** This includes a mix of Basic Pokémon and their evolutions. Aim for a few powerful attackers and some support Pokémon. \* **\*\*Trainer Cards (15-25 cards):\*\*** A good mix of Items, Supporters, and perhaps a Stadium card. Supporters are often key to drawing cards and finding what you need. \* **\*\*Energy Cards (20-30 cards):\*\*** This is the most variable part, depending on the Energy costs of your Pokémon's attacks. Ensure you have enough Energy to power up your attackers consistently. When building your deck, consider synergy: do your Pokémon's attacks work well together? Do your Trainer cards help you set up your key Pokémon quickly?

## **The Battle Begins: Understanding the Turn Structure**

Once you're ready, it's time to battle! Here's how a turn typically flows: 1. **\*\*Start of Your Turn:\*\*** \* **\*\*Draw a card:\*\*** Draw one card from the top of your deck. \* **\*\*Check for effects:\*\*** Some cards or abilities might trigger at the start of your turn. 2. **\*\*Main Part of Your Turn (in any order you choose):\*\*** \* **\*\*Play Basic Pokémon:\*\*** You can place any

number of Basic Pokémon from your hand onto your Bench (up to your Bench limit of 5 Pokémon). \* **Evolve your Pokémon:** If you have Stage 1 or Stage 2 Pokémon in your hand, you can evolve your Pokémon on the Bench or in the Active spot. \* **Important:** You cannot evolve a Pokémon on the same turn you play it from your hand or evolve it. \* **Play Trainer Cards:** You can play any number of Item cards. You can play one Supporter card per turn. You can also play one Stadium card per turn. \* **Attach Energy Cards:** You can attach one Energy card from your hand to one of your Pokémon per turn. This Energy stays attached until it's discarded or removed by a card effect. \* **Retreat your Active Pokémon:** If you have enough Energy attached to your Active Pokémon to pay its Retreat Cost, you can move it to the Bench. Your turn then ends. \* **Use Abilities:** Some Pokémon have Abilities that can be used at any time during your turn, as indicated on the card. 3. **Attacking:** \* If you have an Energy-costing attack, and your Active Pokémon has enough Energy attached to use it, you can choose to attack. \* Declare your attack and the target Pokémon. \* Calculate damage: Apply any Weakness or Resistance. \* If the opponent's Active Pokémon is knocked out, you take a Prize card. \* If the Pokémon is not knocked out, the turn passes to your opponent. 4. **End of Your Turn:** \* If you have more than 6 cards in your hand, you must discard down to 6. \* Your turn officially ends.

## Prize Cards: The Path to Victory

When you knock out an opponent's Pokémon, you get to take one of your face-down Prize cards. Each player starts the game with 6 Prize cards. The first player to take all 6 of their Prize cards wins the game!

## Knocking Out Pokémon: The Mechanics of Damage and Defeat

When a Pokémon's total damage reaches or exceeds its HP, it is Knocked Out. The player whose Pokémon was Knocked Out discards it and all attached cards. They then choose a new Pokémon from their Bench to be their Active Pokémon. The player who delivered the Knock Out takes one Prize card.

## Special Conditions: Adding Complexity to Battles

Pokémon can be afflicted with Special Conditions, which have ongoing effects: \* **Poisoned:** Deals damage at the end of each turn. \* **Burned:** Deals damage at the end of each turn and prevents damage calculation during the attack phase for the burned Pokémon. \* **Confused:** The attacking Pokémon may attack itself. \* **Asleep:** The Pokémon cannot attack or retreat. \* **Paralyzed:** The Pokémon cannot attack or retreat. (This condition wears off at the end of the opponent's next turn).

## Common Beginner Mistakes to Avoid

As you learn to play, it's natural to make a few missteps. Here are some common pitfalls for new players:

- \* \*\*Not enough Energy:\*\* This is a huge one! Without enough Energy, your Pokémon can't attack. Make sure you have a good Energy count in your deck. \*
- \* \*\*Forgetting to evolve:\*\* Evolving your Pokémon is crucial for gaining stronger attacks and abilities. Don't let your Basic Pokémon linger in the Active spot for too long if you have evolutions ready. \*
- \* \*\*Attaching Energy to the wrong Pokémon:\*\* Think strategically about which Pokémon you're powering up. Is it your main attacker? Or a Pokémon you plan to retreat soon? \*
- \* \*\*Not understanding Weakness and Resistance:\*\* This can swing battles in your favor or against you. Always consider these factors when attacking. \*
- \* \*\*Playing too many Supporters:\*\* Remember, you can only play one Supporter card per turn. Plan your Supporter plays wisely.

## Where to Go From Here: Continuing Your Pokémon TCG Journey

This guide is just the beginning! The Pokémon TCG is a deep and rewarding game. Here are some next steps to enhance your gameplay:

## Mastering the Art of Playing the Pokémon Card Game: A Comprehensive Guide

The Pokémon Trading Card Game (TCG) remains a beloved pastime for collectors, strategists, and fans of all ages, blending tactical gameplay with rich storytelling drawn from the iconic Pokémon universe. Whether you're a curious newcomer or a seasoned veteran looking to refine your skills, understanding how to play the Pokémon card game is essential to unlocking its full potential. Far more than a simple card-matching pastime, the game challenges players to think critically, adapt quickly, and anticipate opponents' moves—all while enjoying a dynamic world of creatures, strategies, and evolving mechanics.

At its core, the Pokémon card game is built on a foundation of strategic depth and thematic immersion. Players begin by assembling decks composed of Pokémon cards—each representing unique abilities, strengths, and weaknesses—paired with attribute cards, terrain cards, and special effects. The game unfolds over turns, where each player draws cards, plays Pokémon, activates abilities, and leverages terrain advantages to outmaneuver their opponent. The objective is to reduce your opponent's health to zero while protecting your own, turning every match into a tactical battle of foresight and flexibility.

## **Key Components and Gameplay Mechanics**

Understanding the components is crucial to mastering the game. Standard decks include Pokémon cards divided into species, attributes (such as Fire, Water, or Psychic), and level-based power, alongside attribute cards that enhance attacks, defense, or special moves. Terrain cards introduce environmental effects—like Steam kopnyc or Mystic stone—that alter how cards function, adding layers of strategy. The game's pacing is driven by turn-based execution, where players draw from their hand, play cards, and respond to opponents' actions within structured phases: draw, play, attack, and end. This rhythm ensures clarity and fairness, allowing players to focus on strategy without confusion.

A defining feature of the Pokémon TCG is its evolving meta, shaped by new card releases, rule adjustments, and community-driven strategies. Each expansion introduces fresh Pokémon, hybrid strategies, and synergies that reshape competitive play. Players must stay informed through official rulebooks, official strategy guides, and active forums to adapt and remain competitive. This dynamic environment rewards not just card knowledge, but also the ability to analyze trends, anticipate shifts, and refine deck builds accordingly.

## **Strategic Applications and Competitive Play**

Beyond casual play, the Pokémon card game offers rich applications in competitive settings, from local tournaments to global championships. Success hinges on meticulous deck construction—balancing offensive power with defensive resilience, integrating complementary Pokémon, and crafting synergistic combinations that exploit matchups and terrain advantages. Players often specialize in specific Pokémon types or strategies, such as control decks that limit opponent options, or burn decks designed to finish games quickly, each requiring deep understanding of card interactions and opponent psychology. The game's depth encourages creative problem-solving: countering an opponent's fire-heavy lineup might involve selecting ice or grass types with high resistance, while exploiting terrain effects like a Stealth Rock to negate a powerful attack. These nuances make every match a unique challenge, fostering continuous learning and adaptation.

## **Benefits of Playing the Pokémon Card Game**

Engaging with the Pokémon TCG delivers numerous benefits beyond entertainment. It sharpens critical thinking and decision-making skills, as players must evaluate risks, predict outcomes, and adjust plans mid-game. The game also enhances pattern recognition and memory, especially when tracking opponents' playstyles and card availability. For many, the social dimension—playing with friends, joining clubs, or participating in online communities—adds emotional and motivational value, transforming solitary play into shared experiences. Additionally, the game nurtures creativity and resource management. Building a winning deck is an art form, requiring experimentation, testing, and refinement. Players learn to maximize the strengths of limited resources, embodying strategic thinking that extends beyond the game into real-life problem-solving.

## **Looking Ahead: The Future of the Pokémon TCG**

The future of the Pokémon Trading Card Game remains vibrant and forward-thinking. With ongoing digital integration—such as augmented reality features and online tournament platforms—the game continues to bridge physical and digital play, expanding accessibility and engagement. The consistent release of new cards and expansions ensures a fresh experience, keeping longtime fans invested and new players excited. Moreover, the game's educational potential is growing, with schools and community programs increasingly using card games to teach strategy, collaboration, and digital literacy. As competitive play evolves, so too does the depth of strategy, supported by advanced analytics and community-driven knowledge sharing. The Pokémon TCG stands not only as a nostalgic treasure but as a dynamic, evolving ecosystem where players of all levels can grow, compete, and connect in meaningful ways. Whether you play for fun, challenge, or community, mastering the game unlocks a world of creativity, strategy, and endless discovery.

This comprehensive guide will walk you through everything you need to know to start playing the Pokémon TCG, from building your first deck to mastering battle strategies. Get ready to embark on your journey to become a Pokémon Master!

## **Understanding the Pokémon TCG: The Core Concepts**

At its heart, the Pokémon TCG is a game of strategy, resource management, and a bit of luck. Two players face off with their custom-built decks, aiming to defeat their opponent's

Pokémon by reducing them to zero Prize cards. The game revolves around Pokémon cards, Trainer cards, and Energy cards, each with distinct roles.

## The Goal of the Game: Winning Conditions

There are three primary ways to win a game of Pokémon TCG:

1. **Taking all of your Prize cards:** When a Pokémon is Knocked Out, the player who landed the finishing blow takes a Prize card from their opponent's Prize card stack. Typically, players start with six Prize cards, and the first to collect them all wins.
2. **Knocking out all of your opponent's Pokémon:** If your opponent runs out of Pokémon on their Bench and in play, you win. This is less common but a viable strategy.
3. **Your opponent has no cards left to draw:** If a player needs to draw a card and their deck is empty, they lose the game. This is known as decking out.

## The Anatomy of a Pokémon Card

Every Pokémon card is a miniature battlefield of information. Understanding these elements is crucial:

1. **Pokémon Name:** The identity of the creature.
2. **HP (Hit Points):** The amount of damage a Pokémon can take before being Knocked Out.
3. **Type:** Pokémon have elemental types (e.g., Fire, Water, Grass, Lightning, Psychic, Fighting, Darkness, Metal, Fairy, Dragon, Colorless). These types determine weaknesses and resistances.
4. **Weakness:** The type of Pokémon that deals double damage to this Pokémon.
5. **Resistance:** The type of Pokémon that deals reduced damage to this Pokémon.
6. **Abilities:** Special passive effects that are always in play while the Pokémon is in play.
7. **Attacks:** The offensive moves a Pokémon can use. Each attack has a cost (in Energy cards) and deals a certain amount of damage. Some attacks have additional effects.
8. **Retreat Cost:** The number of Energy cards that must be discarded from the Pokémon to move it from the Active Spot to the Bench.
9. **Stage:** Pokémon cards can be Basic, Stage 1, or Stage 2. You can only evolve a Pokémon from its Basic form to Stage 1, and then to Stage 2, provided you have the corresponding Evolution cards.

## Trainer Cards: The Strategic Backbone

Trainer cards are the supporting cast that enable powerful plays and strategic maneuvers. They are divided into three categories:

1. **Items:** These cards can be played at any time during your turn and have immediate

- effects, such as drawing cards, searching your deck, or healing damage.
2. **Supporters:** These are powerful cards that can only be played once per turn, regardless of how many Supporter cards you have in hand. They often offer significant advantages like drawing multiple cards or disrupting your opponent.
  3. **Stadiums:** These cards affect both players and remain in play until another Stadium card is played or they are otherwise removed.

## Energy Cards: The Fuel for Attacks

Energy cards are essential for powering your Pokémon's attacks. There are two main types:

1. **Basic Energy:** These cards represent the fundamental energy types (Fire, Water, Grass, etc.).
2. **Special Energy:** These cards provide unique effects in addition to or instead of energy.

To use an attack, you must attach the required Energy cards from your hand to your Pokémon. You can only attach one Energy card per turn.

## Setting Up Your First Game

Before you can battle, you need to prepare your play area and your deck.

## Building Your Deck: The Foundation of Strategy

A standard Pokémon TCG deck consists of exactly 60 cards. The general guidelines for deck construction are:

1. **Pokémon Cards:** Aim for 20-30 Pokémon cards, including a mix of Basic, Stage 1, and Stage 2 Pokémon. Don't forget to include enough Basic Pokémon to start the game.
2. **Trainer Cards:** Include 20-30 Trainer cards, balancing Items, Supporters, and potentially a Stadium card.
3. **Energy Cards:** You'll typically need around 10-20 Energy cards. The exact number depends on the Energy costs of your Pokémon's attacks.

When building your deck, consider a cohesive strategy. Some popular deck archetypes include:

1. **Aggro Decks:** Focus on quickly attacking and knocking out opponent Pokémon with high damage output.
2. **Control Decks:** Aim to disrupt the opponent's strategy, prevent them from attacking, and win by decking them out or by slowly chipping away at their Pokémon.
3. **Combo Decks:** Rely on specific card combinations to achieve powerful effects or win conditions.

For beginners, starting with pre-built theme decks or starter decks is highly recommended. These decks are designed to be playable right out of the box and offer a good introduction to the game's mechanics.

## The Play Area: Organizing Your Cards

You'll need a flat surface to play. Here's how you set up your game:

1. **Deck:** Place your 60-card deck face down.
2. **Prize Cards:** Draw the top six cards from your deck and place them face down in a separate pile. These are your Prize cards.
3. **Discard Pile:** Designate an area for discarded cards.
4. **Active Spot:** This is where your main attacking Pokémon goes.
5. **Bench:** This is where up to five of your other Pokémon can be placed.

## Starting the Game: The First Few Turns

Here's the standard procedure for starting a game:

1. **Shuffle your deck thoroughly.**
2. **Draw seven cards.** This is your starting hand.
3. **Identify Basic Pokémon.** If you have at least one Basic Pokémon in your hand, place it face down in your Active Spot. Then, place up to five more Basic Pokémon face down on your Bench. If you don't have any Basic Pokémon, reveal your hand to your opponent, shuffle your hand back into your deck, and draw a new hand of seven cards. This is a mulligan, and you can do this multiple times until you have a Basic Pokémon.
4. **Flip a coin (or use another agreed-upon method) to determine who goes first.**
5. **If you go first, your first turn is limited.** You cannot attack on your first turn. You can attach an Energy card, play Trainer cards, and evolve your Pokémon.
6. **If your opponent goes first, they can attack on their first turn (provided they have the necessary Energy).**

## Playing the Game: Your Turn in Detail

Each turn in the Pokémon TCG follows a specific sequence of actions. You can perform these actions in any order you choose, except for the "End of Turn" step.

### The Turn Sequence: Step-by-Step

1. **Start of Turn:** This is where some card effects might trigger.
2. **Draw a Card:** Draw one card from the top of your deck. This is a mandatory action unless you've already drawn a card this turn through another effect.
3. **Main Phase:** This is where you can perform any of the following actions as many times as you wish, in any order:

1. **Attach one Energy card** from your hand to one of your Pokémon.
2. **Play Item cards.**
3. **Play Supporter cards** (only one Supporter per turn).
4. **Play Evolution cards** to evolve your Pokémon.
5. **Switch your Active Pokémon** with a Pokémon on your Bench by paying the Retreat Cost of the Active Pokémon.
6. **Use Pokémon Abilities.**
4. **Attack:** If you have a Pokémon in your Active Spot with enough Energy attached to use an attack, you may choose to attack. Declare which attack you are using and discard the required Energy cards from your Pokémon. Your opponent then has a chance to play Trainer cards or use abilities that might affect the attack.
5. **End of Turn:** Some card effects might trigger at the end of your turn.

## Attacking and Damage Calculation

When you use an attack:

1. **Declare the attack** and ensure the required Energy cost is met.
2. **Discard the Energy cards** from the attacking Pokémon.
3. **Apply any additional effects** of the attack.
4. **If the attack deals damage**, calculate the damage dealt. This is the base damage of the attack, modified by Weakness, Resistance, and any other card effects.
5. **Apply damage counters** to the defending Pokémon.
6. **Check for Knock Outs.** If the damage dealt is equal to or greater than the defending Pokémon's HP, it is Knocked Out. The player who landed the Knock Out takes a Prize card.

## Damage Modifiers: Weakness and Resistance

These are critical for strategic play:

1. **Weakness:** If the attacking Pokémon's type is the same as the defending Pokémon's Weakness type, the damage is doubled.
2. **Resistance:** If the attacking Pokémon's type is the same as the defending Pokémon's Resistance type, the damage is reduced by a set amount (usually -30).

It's important to remember that Weakness and Resistance are applied after all other damage calculations. You can't have negative damage. If damage is reduced to zero or less, no damage is applied.

## Evolving Your Pokémon: Powering Up

To evolve a Pokémon, you must have the corresponding Evolution card in your hand and the Pokémon you want to evolve must be in play. You can only evolve a Pokémon that

has been in play since the start of your turn, or on a previous turn. You cannot evolve a Pokémon the same turn it was put into play (unless it's a special case like with a specific card effect). Attach the Evolution card to the Pokémon, and it evolves into its next stage.

## Retreating: Strategic Positioning

If your Active Pokémon is not in a good position to attack, or if it's low on HP, you can retreat it to the Bench. This costs you Energy cards equal to the Pokémon's Retreat Cost. The retreated Pokémon is then placed on your Bench, and you choose another Pokémon from your Bench to become your new Active Pokémon.

## Advanced Strategies and Tips for Success

Once you've grasped the basics, you can start exploring more advanced tactics.

### Bench Management: More Than Just Backup

Your Bench is not just a place for Pokémon waiting to be evolved; it's a strategic resource. You can use your Bench to:

1. **Store powerful attackers** that can be switched into play when needed.
2. **Set up evolutions** for future turns.
3. **Protect essential Pokémon** from being targeted by the opponent.
4. **Utilize Bench-specific abilities** that support your strategy.

### Card Advantage: The Key to Victory

Card advantage refers to having more cards in hand or on the board than your opponent. This can be achieved through cards that draw multiple cards, search your deck, or disrupt your opponent's hand. Mastering card advantage is crucial for consistent wins.

### Understanding the Metagame: Staying Ahead

The "metagame" refers to the most popular and effective decks and strategies currently being played. Staying informed about the metagame can help you:

1. **Build effective counter-decks.**
2. **Anticipate your opponent's moves.**
3. **Adapt your own deck** to current trends.

Websites, forums, and competitive tournament results are excellent resources for understanding the metagame.

## Practice, Practice, Practice!

The best way to improve is to play! Play against friends, join local game store tournaments, or even try online simulators. The more you play, the more familiar you'll become with different card interactions, common strategies, and the nuances of the game.

## Where to Go Next: Continuing Your Pokémon TCG Journey

|--------|---------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1      | I'm totally new to Pokémon TCG. What's the absolute easiest way to get started and learn the ropes?           | The best starting point is the official Pokémon TCG Live app! It's free, guides you through tutorials, and lets you play against others or AI. You can also pick up a pre-built 'Battle Academy' box, which includes everything you need for two players to learn and play right away.     |
| 2      | What are the most important card types I need to know about to play the Pokémon TCG?                          | You'll need to understand Pokémon cards (your attackers), Trainer cards (which provide various effects like drawing cards or healing), and Energy cards (which power up your Pokémon's attacks). Basics are key, but don't forget about Evolution Pokémon that can get stronger over time! |
| 3      | How do I actually win a game of Pokémon TCG? Is it just by knocking out all my opponent's Pokémon?            | There are three ways to win: 1. Take 6 Prize cards (earned by knocking out your opponent's Pokémon). 2. Your opponent has no Pokémon left in play. 3. Your opponent cannot draw any more cards from their deck. Focusing on Prize cards is the most common strategy.                       |
| 4      | I've heard about different 'formats' in the Pokémon TCG. What's the difference between Standard and Expanded? | Standard format uses the most recent sets, encouraging a dynamic and evolving metagame. Expanded format includes a much larger pool of cards from past sets, offering more strategic depth and deck-building possibilities. Most official tournaments use Standard.                        |

|   |                                                                                                                 |                                                                                                                                                                                                                                                                                                      |
|---|-----------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 5 | My Pokémon keeps getting knocked out! How can I protect my powerful attackers and keep them in the game longer? | Consider using Pokémon with high HP, abilities that offer protection, or Trainer cards that can heal damage or switch Pokémon. Also, ensure you have enough Energy attached to your Pokémon to use their strongest attacks quickly. Sometimes, strategic retreats are better than taking a hit!      |
| 6 | What's the deal with 'V', 'VMAX', and 'VSTAR' Pokémon? Are they super important?                                | Yes! These are powerful Pokémon that give up more Prize cards when knocked out but offer significantly stronger attacks and abilities. VSTAR Pokémon have a special 'VSTAR Power' that can be used once per game. Mastering these can give you a major advantage.                                    |
| 7 | I want to build my own deck. What are some general guidelines for a good starting deck composition?             | A good rule of thumb is to aim for around 15-20 Pokémon, 15-20 Trainer cards, and 10-15 Energy cards. Focus on having a few strong attackers, supporting Pokémon, and a good mix of draw, search, and disruption Trainer cards. Always tailor your Energy count to the Energy costs of your attacks! |
