Tired of the Tunnel Vision? How to Stop Your Dog from Digging

We love our dogs for so many reasons: their boundless enthusiasm, their furry cuddles, and their unwavering loyalty. But let's be honest, sometimes their adorable quirks can turn into... well, a bit of a digging disaster. Whether it's meticulously excavating your prize-winning roses, creating a miniature Grand Canyon in your lawn, or unearthing your carefully placed patio stones, a dog who loves to dig can leave you feeling frustrated and your yard looking like a war zone. If you're finding yourself constantly sighing at fresh holes in your garden, or if your furry friend seems to have an insatiable urge to be a canine archaeologist, you're not alone. Digging is a natural dog behavior, but that doesn't mean you have to live with the destruction. This comprehensive guide will dive deep into **why** your dog might be digging and, more importantly, offer practical, humane, and effective strategies to help you reclaim your yard.

Understanding the "Why": Decoding Your Dog's Digging Drive

Before we can effectively stop a behavior, we need to understand its root cause. Dogs don't dig just to spite you; there's usually a compelling reason behind their excavation endeavors. Identifying this reason is the first crucial step in finding the right solution for your dog.

Boredom and Pent-Up Energy: The "Too Much Time, Not Enough To Do" Diggers

This is arguably the most common reason for digging. If your dog isn't getting enough physical and mental stimulation, they'll find ways to entertain themselves. Digging can be an incredibly satisfying activity for a dog, providing an outlet for excess energy and a sense of accomplishment. Think of it as their self-made entertainment system. ****Signs:*** Digging in random places, excessive barking, destructive chewing, restlessness. ****Keywords:*** Dog boredom, excess energy, exercise needs, mental stimulation for dogs, dog activity, canine boredom busters.

Seeking Comfort or Escape: The "I Need to Get Out or Get Cozy" Diggers

Dogs may dig to create a more comfortable resting spot, especially on hot or cold days. A cool patch of earth can be a welcome relief from the summer sun, while a dug-out den might offer warmth in winter. Sometimes, digging at fences or doors can be an attempt to escape confinement or seek out something interesting (or someone) they perceive to be on the other side. ****Signs:*** Digging under fences, near doors, or in shaded areas. ****Keywords:*** Dog escape artist, escaping confinement, dog comfort, denning behavior, seeking cool spots, dog enclosure.

Instinctual Prey Drive: The "I Hear Something and I Must Catch It" Diggers

Many breeds were originally developed for hunting and have a strong prey drive. This instinct can manifest as digging when they catch the scent of a rodent, rabbit, or even an insect underground. They're not trying to destroy your garden; they're trying to "catch" their quarry. ****Signs:*** Focused digging in specific areas where they've detected activity, often with intense sniffing. ****Keywords:*** Prey drive in dogs, hunting instinct, scent hounds, rodent control, digging for prey.

Anxiety and Stress: The "I'm Not Okay, So I'll Dig" Diggers

Just like humans might fidget or pace when stressed, dogs can resort to digging as a coping mechanism. Separation

anxiety is a prime culprit, but other stressors like loud noises, changes in the household, or feeling insecure can also trigger digging behavior. * **Signs:** Digging primarily when left alone, accompanied by other signs of anxiety like whining, pacing, or house soiling. * **Keywords:** Dog anxiety, separation anxiety in dogs, stress in dogs, coping mechanisms, nervous diggers.

Territorial Marking: The "This is My Spot" Diggers

In some cases, dogs may dig to mark their territory. While less common than other reasons, it can be part of a broader territorial behavior, especially if they are not neutered or spayed. * **Keywords:** Territorial behavior dogs, dog scent marking, neutering dogs, spaying dogs.

Strategies for a Hole-Free Yard: Practical Solutions to Stop Digging

Now that we've explored the "why," let's get to the "how." Remember, consistency and patience are key. You might need to try a combination of these methods to find what works best for your unique dog.

1. Boost Physical and Mental Exercise: The Ultimate Digging Deterrent

This is your first and most important line of defense. A tired dog is a good dog, and an enriched dog is a happy dog. If your dog is spending their energy constructively, they'll have less inclination to dig destructively.

Daily Walks and Runs

Ensure your dog is getting sufficient daily exercise. The amount will vary depending on breed, age, and energy level, but aim for at least 30-60 minutes of vigorous activity per day. This could be a brisk walk, a jog, a game of fetch, or a romp at a dog park. * **Keywords:** Dog exercise routine, daily dog walks, energetic breeds, dog fitness, physical activity for dogs.

Interactive Play and Puzzle Toys

Engage your dog's mind! Puzzle feeders, treat-dispensing toys, and interactive games can provide mental stimulation that tires them out just as effectively as physical exercise. Rotate toys to keep things interesting. * **Keywords:** Mental stimulation for puppies, dog puzzle toys, interactive dog games, canine enrichment, brain games for dogs.

Training Sessions

Short, regular training sessions can be incredibly beneficial. Teaching new tricks or practicing obedience commands exercises their brain and strengthens your bond, which can reduce anxiety-related digging. * **Keywords:** Dog obedience training, positive reinforcement training, learning new tricks, dog behavior modification.

2. Make the Yard Less Appealing (or More Appealing Elsewhere!)

Sometimes, a little environmental management can go a long way.

Create a Designated Digging Zone

This might sound counterintuitive, but it can be a highly effective solution for dogs with a strong digging drive. Designate a

specific area in your yard (a sandpit or a designated patch of loose soil) and make it super fun and rewarding for digging *there*. Bury treats or favorite toys in this zone and praise your dog enthusiastically when they dig in it. When you see them digging elsewhere, gently redirect them to their designated spot. * **Keywords:** Dog sandbox, designated digging area, positive redirection, reward-based training for digging.

Deterrents in Unwanted Areas

For areas you absolutely don't want your dog to dig, consider using deterrents. These should be humane and not harmful. * **"Unpleasant" Scents:** Some dogs dislike certain smells. Try scattering citrus peels, cayenne pepper (use sparingly and with caution, especially if your dog has sensitive skin or eyes), or commercially available dog repellents in the areas they target. * **Physical Barriers:** Placing chicken wire or hardware cloth just beneath the surface of the soil can make digging uncomfortable and unsuccessful. Rocks or large stones can also make digging difficult in specific spots. * **Water Sprinklers:** Motion-activated sprinklers can be a surprising deterrent for some dogs, providing a harmless surprise when they approach an unwanted digging area. * **Keywords:** Dog repellent for gardens, natural dog deterrents, garden protection from dogs, humane deterrents for dogs.

Secure Fences and Gates

If your dog is digging to escape, reinforcing your fencing is crucial. Bury the bottom of the fence a foot or so into the ground, or add L-shaped wire mesh along the base. Ensure gates are securely latched. * **Keywords:** Dog fence repair, secure dog enclosure, preventing dog escape, reinforcing fences.

3. Address Underlying Issues: Tackling Anxiety and Stress

If you suspect anxiety is the root cause, it's essential to address the anxiety itself.

Separation Anxiety Management

For dogs who dig when left alone, you'll need a multi-pronged approach. * **Gradual Desensitization:** Start by leaving your dog for very short periods and gradually increase the time. * **Provide Distractions:** Leave them with engaging puzzle toys or long-lasting chews. * **Calming Aids:** Consider dog-appeasing pheromone diffusers, calming treats, or even a Thundershirt. * **Professional Help:** If separation anxiety is severe, consult a certified professional dog trainer or veterinary behaviorist. * **Keywords:** Separation anxiety treatment, dog appeasing pheromones, calming aids for dogs, dog behaviorist, professional dog training.

Identify and Mitigate Other Stressors

Observe your dog for other signs of stress or fear. If loud noises are a trigger, create a safe space for them during thunderstorms or fireworks. If changes in the household are the cause, provide extra comfort and routine. * **Keywords:** Dog stress management, fear of loud noises, dog calming routines, environmental enrichment.

4. Training and Redirection: Teaching the "Right" Way to Behave

Training plays a vital role in discouraging unwanted digging and encouraging good behavior.

The "Leave It" Command

Teaching your dog to "leave it" can be invaluable. When you catch them starting to dig in an unwanted spot, use this

command to distract them and redirect their attention. * **Keywords:** "Leave it" command for dogs, dog impulse control, redirecting dog behavior.

Positive Reinforcement for Good Behavior

When you see your dog *not* digging, or when they are happily playing in their designated digging zone, praise them and offer a small treat. This reinforces the desired behavior. * **Keywords:** Positive reinforcement dog training, rewarding good behavior, canine behavior modification.

5. Managing Prey Drive: Redirecting the Hunter Within

If your dog's digging is driven by prey instincts, the goal is to redirect that drive rather than suppress it entirely.

More Intense Play and "Hunting" Games

Engage your dog in games that mimic hunting, like fetch with a flirt pole, or scent games where they have to "hunt" for hidden treats. This can satisfy their natural instincts in a controlled way. * **Keywords:** Flirt pole for dogs, scent work for dogs, redirecting prey drive, dog hunting games.

Rodent Control (Humane)

If you suspect your dog is digging because of rodents in your yard, consider humane rodent control methods. This will remove the temptation for your dog. * **Keywords:** Humane rodent control, pest prevention for gardens, deterring wildlife.

What NOT to Do: Common Mistakes to Avoid

It's easy to get frustrated, but some well-intentioned reactions can actually make the problem worse.

Punishment

Punishing your dog after the fact (e.g., scolding them when you discover a hole) is ineffective. They won't connect the punishment to the digging that happened hours or even minutes ago. This can also lead to fear and anxiety, potentially exacerbating the digging problem.

Yelling or Harsh Corrections

Loud noises and harsh corrections can scare your dog and damage your relationship, leading to increased anxiety and digging.

Ignoring the Problem

Hoping the digging will just stop on its own is rarely successful. Addressing the root cause is essential.

When to Seek Professional Help

While many digging issues can be resolved with patience and consistent training, some may require expert intervention. If your dog's digging is: * **Severe and persistent despite your best efforts.** * **Accompanied by significant anxiety or

destructive behaviors.***Potentially dangerous to your dog (e.g., digging near utilities).** Consult a certified professional dog trainer, a veterinary behaviorist, or your veterinarian. They can help diagnose the underlying cause and develop a tailored behavior modification plan.

Conclusion: Patience, Persistence, and a Hole-Free Future

Stopping your dog from digging is a journey, not a race. By understanding the motivations behind their actions, implementing consistent strategies, and focusing on positive reinforcement, you can significantly reduce or eliminate unwanted digging. Remember to celebrate small victories and be patient with your furry friend. With the right approach, you can enjoy a beautiful yard and a happy, well-adjusted dog. Happy training, and may your gardens remain (mostly) intact! ***Keywords:** Dog training tips, solving dog behavior problems, happy dog owner, garden security, pet ownership.

Understanding the Digging Instinct in Dogs

Dogs have an innate drive to dig, rooted deeply in their evolutionary history. For wild canines, digging was essential for creating dens to shelter themselves and their offspring, storing food, or escaping harsh weather. Even domesticated dogs retain this instinct, though their survival needs are met differently. This natural behavior often manifests in backyard holes, garden trenches, or disturbed soil, leaving pet owners frustrated yet puzzled. Recognizing that digging is not merely mischief but a deeply ingrained instinct is the first step toward effectively managing it without undermining your dog's well-being.

Identifying the Triggers Behind Destructive Digging

Digging behavior in dogs rarely occurs without cause; it's usually a response to underlying needs or environmental stimuli. Boredom stands out as a common culprit—dogs with excessive energy and insufficient mental or physical stimulation often resort to digging to entertain themselves. Anxiety and stress also drive this behavior; a dog may dig to create a safe, enclosed space when feeling overwhelmed by loud noises, new people, or changes in routine. Other triggers include the thrill of scent exploration—dogs are naturally curious, and digging allows them to uncover hidden smells beneath the surface—and the simple desire to escape a confined area. By observing when and why your dog digs, you can tailor solutions that address the root cause rather than just suppressing the symptom.

Effective, Compassionate Strategies to Redirect Digging Behavior

Rather than relying on harsh deterrents, the most effective way to stop dogs from digging lies in understanding and redirecting their instincts with thoughtful environmental and behavioral adjustments. Providing ample mental stimulation through puzzle toys, interactive games, and regular training sessions helps satisfy curiosity and reduce boredom-driven digging. Daily exercise—whether brisk walks, runs, or play sessions—also channels excess energy, making destructive digging far less likely. Creating designated digging zones, such as a sand box filled with safe soil, gives your dog a socially acceptable outlet for their natural urge to excavate. Supervision is key during outdoor time, especially in gardens, to gently discourage digging before it begins. Positive reinforcement, rewarding calm behavior and redirecting attention to appropriate activities, reinforces good habits without fear or punishment.

The Benefits of Managing Digging Behavior Thoughtfully

Addressing digging through compassionate, informed methods yields lasting benefits beyond a tidier yard. Dogs that

engage their minds and bodies in healthy ways experience reduced stress and anxiety, leading to improved emotional stability and stronger bonds with their owners. A well-occupied dog is less likely to develop other problem behaviors born from frustration or understimulation, such as chewing or barking. Moreover, managing digging fosters a more harmonious relationship between pet and owner, built on trust and mutual understanding. By respecting your dog's instincts while guiding their behavior, you nurture a more confident, contented companion capable of thriving in a domestic setting.

Looking Ahead: Innovations in Canine Behavior Management

As awareness of canine psychology grows, so too do the tools and techniques for managing instinctual behaviors like digging. Smart training devices, interactive apps, and enriched living environments continue to evolve, offering new ways to engage a dog's senses and channel energy positively. Future developments may include personalized behavioral apps that adapt to individual dogs' needs, as well as enhanced garden designs that naturally discourage digging without restricting freedom. The shift from punitive approaches to empathetic solutions reflects a broader movement toward ethical, science-backed pet care. By staying informed and proactive, owners can support their dogs in fulfilling their natural instincts responsibly—ensuring both happiness for the pet and peace of mind for the family.

Unearthing the Solution: Your Comprehensive Guide to Stopping Dogs from Digging

By [Your Name/Journalist Persona]

Published: [Date]

The tell-tale signs are often unmistakable: freshly dug holes marring a pristine lawn, prized petunias uprooted, or a disgruntled gardener surveying the damage. For many dog owners, the act of digging is a frustrating, and sometimes destructive, canine behavior. While it's a natural instinct for many breeds, it doesn't mean you have to accept your yard becoming a lunar landscape. This comprehensive guide will delve into the root causes of digging and provide actionable, SEO-friendly strategies to help you reclaim your garden and restore peace to your pet's paws.

Understanding Why Your Dog is Digging

Before we can effectively stop digging, we must first understand its origins. Dogs dig for a multitude of reasons, and identifying the specific trigger for your canine companion is the first crucial step. This often involves observing your dog's behavior, the location of their digging, and any underlying environmental or emotional factors.

Boredom and Excess Energy

One of the most common culprits behind a dog's digging habit is simply a lack of mental and physical stimulation. Breeds known for their energetic nature, such as Huskies, Border Collies, and Jack Russell Terriers, require significant daily exercise. When these needs aren't met, dogs may resort to digging as a way to expend pent-up energy and alleviate boredom. Think of it as their way of creating their own entertainment.

Instinct and Breed Predisposition

Many dog breeds were historically developed for specific tasks that involved digging. Terriers, for example, were bred to hunt small animals underground. Dachshunds, with their long bodies and short legs, were designed to flush out prey from burrows. Even hounds might dig to follow scents that lead them underground. Understanding your dog's breed can provide valuable insight into their inherent digging tendencies. This is a primal behavior that can be difficult to completely eradicate but can be managed with the right strategies.

Seeking Comfort or a Cool Escape

On hot days, dogs may dig holes to find cooler earth beneath the surface. This instinct to escape the heat can be particularly strong during summer months. Conversely, in colder weather, they might dig to find a warmer, sheltered spot. This behavior is driven by a basic need for comfort and temperature regulation.

Hunting Prey

If your yard is home to moles, voles, gophers, or other small creatures, your dog might be digging in pursuit of these enticing scents and movements. The thrill of the hunt, even for tiny prey, can be a powerful motivator for a dog. This is particularly true for scent hounds and terriers.

Anxiety and Stress

For some dogs, digging can be a coping mechanism for anxiety or stress. Separation anxiety, loud noises (like thunderstorms or fireworks), or changes in their environment can all trigger digging as a way to self-soothe or escape perceived threats. This type of digging is often more frantic and widespread.

Attention Seeking

Unfortunately, even negative attention can be a reward for some dogs. If your dog learns that digging leads to you coming outside and interacting with them (even if it's to scold them), they may continue the behavior to get you to notice them. This is a common behavior learned through operant conditioning.

Effective Strategies to Deter Digging

Once you've identified the likely cause of your dog's digging, you can implement targeted strategies. A multi-pronged approach is often the most successful, combining management techniques, training, and environmental enrichment.

Provide Adequate Exercise and Mental Stimulation

This is non-negotiable, especially for high-energy breeds. Ensure your dog gets at least 30-60 minutes of vigorous exercise daily. This can include brisk walks, runs, playing fetch, or engaging in dog sports like agility. Mental stimulation is equally important. Puzzle toys, interactive feeders, and scent games can keep their minds occupied and reduce the likelihood of them turning to digging out of boredom. A tired dog is a good dog, and a mentally stimulated dog is less likely to seek destructive outlets.

Enriching Your Dog's Environment

Beyond just physical activity, create an enriching environment for your dog. This could involve rotating their toys, providing new scent experiences on walks, or even enrolling them in obedience classes. Training not only strengthens

your bond but also provides mental challenges. Consider introducing them to canine enrichment activities.

Create a Designated Digging Area

Instead of trying to stop digging altogether, why not channel it? Designate a specific area in your yard where digging is allowed. This could be a sandpit, a designated patch of soft earth, or even a large, sturdy sandbox. Bury toys or treats in this area to make it an attractive and rewarding place for digging. When you catch your dog digging elsewhere, redirect them gently to their designated spot and praise them when they dig there. This is a form of positive reinforcement.

Making the Digging Zone Appealing

To further encourage use of the designated digging area, make it more appealing than other parts of your yard. Bury their favorite toys, hide high-value treats, or even sprinkle some of their favorite scents within the sandpit. This makes it a fun and rewarding exploration zone.

Make Undesired Digging Spots Unappealing

You can deter digging in certain areas by making them unpleasant. * **Bury deterrents:** Bury chicken wire, rocks, or thorny branches just beneath the surface of the soil in areas you want to protect. This makes digging uncomfortable for their paws. * **Citrus peels or coffee grounds:** Many dogs dislike the smell of citrus or coffee grounds. Scattering these around the perimeter of flower beds or gardens can act as a natural repellent. * **Physical barriers:** Install fences, raised garden beds, or landscape timbers around vulnerable areas. This creates a physical deterrent that makes access difficult.

Addressing Hunting Instincts

If your dog is digging due to prey drive, consider focusing on their recall training and ensuring they are on a leash in areas with potential prey. While you can't eliminate their instinct, you can manage its expression. In some cases, providing appropriate outlets for their hunting instincts, such as scent work or controlled field activities, can be beneficial. Consult with a professional dog trainer for tailored advice on managing prey drive.

Managing Anxiety and Stress

If you suspect your dog's digging is a symptom of anxiety, consult with your veterinarian or a certified professional dog trainer. They can help identify the underlying cause and recommend appropriate solutions, which may include behavior modification techniques, environmental changes, or in some cases, medication. Creating a predictable routine and providing a safe, quiet space can also help reduce general anxiety. For separation anxiety, gradual desensitization techniques are often employed.

Redirecting and Reinforcing Good Behavior

When you catch your dog digging in an inappropriate spot, don't just punish them. Calmly interrupt the behavior and redirect them to an acceptable activity, such as playing with a toy or going to their designated digging area. When they engage in appropriate behaviors (like chewing a toy or resting calmly), offer praise and rewards. Positive reinforcement is key to shaping desired behavior. This focuses on rewarding what you *want* them to do, rather than solely punishing what you don't.

Supervision is Key

Especially during the initial stages of training, close supervision is essential. This allows you to intervene the moment your

dog starts to dig inappropriately and redirect them immediately. Leaving unsupervised dogs with a history of digging in the yard can set back your progress significantly. Consider confining your dog to a secure area or keeping them indoors when you cannot supervise them directly.

When to Seek Professional Help

While many digging behaviors can be managed with consistent training and environmental adjustments, some may require professional intervention. If your dog's digging is extreme, destructive, or accompanied by other concerning behaviors like excessive barking, chewing, or aggression, it's wise to consult with a:

Certified Professional Dog Trainer (CPDT-KA or CPDT-KSA)

A qualified dog trainer can assess your dog's behavior, identify underlying issues, and develop a personalized training plan to address their specific needs. They can teach you effective methods for redirection and positive reinforcement.

Veterinary Behaviorist

For more complex behavioral issues, such as severe anxiety or compulsive digging, a veterinary behaviorist can provide a diagnosis and treatment plan, which may include medication in conjunction with behavior modification. They have a deep understanding of canine psychology and pharmacology.

Conclusion: Patience and Persistence

Stopping a dog from digging is rarely an overnight fix. It requires understanding, patience, and consistent application of the right strategies. By addressing the root cause of the behavior, providing sufficient outlets for their natural instincts, and reinforcing desired actions, you can significantly reduce or even eliminate unwanted digging. Remember that for many dogs, digging is a natural and fulfilling activity. The goal is not necessarily to extinguish the behavior entirely, but to redirect it into acceptable channels. With dedication and the right approach, you can enjoy a beautiful yard and a happy, well-behaved canine companion.

Questions & Answers About how to stop dogs from digging

No	Question	Answer
----	----------	--------

1	My dog's a digging fiend! What are the top reasons they dig holes, and how can I tackle the root cause?	Dogs dig for various reasons: boredom, seeking attention, trying to escape, hunting prey, or even to cool themselves down. Address boredom with more exercise and mental stimulation (puzzle toys, training). If they're digging for attention, provide positive reinforcement when they're <i>*not*</i> digging. For escape artists, secure fences are key. If they're after critters, rodent control or deterrents might be necessary. For temperature regulation, a cooling mat or shaded area can help.
2	I've tried everything, but my dog still digs in the garden. Is there a safe way to make certain areas off-limits?	Yes, you can create 'no-dig' zones. Try burying chicken wire or hardware cloth just below the surface in problematic areas; dogs dislike the feel. You can also use dog-specific deterrent sprays (ensure they're non-toxic and natural), or strategically place large rocks or landscaping features. Consistent redirection to acceptable chewing or digging toys is also crucial.
3	My puppy loves to dig up the flowerbeds. How can I teach them to leave the plants alone without punishing them?	Redirecting is key for puppies! When you see them start to dig, interrupt gently with a cheerful 'uh-oh' or a gentle clap, then immediately offer a desirable alternative like a chew toy or a game of fetch. Praise them enthusiastically when they engage with the alternative. You can also create a designated 'digging pit' filled with sand or loose soil where they <i>*are*</i> allowed to dig, and praise them when they use it.
4	My dog digs holes everywhere – the lawn, the garden, even the carpet! What are some quick fixes to stop this behavior?	Quick fixes often involve redirection and management. For outdoor digging, try filling their holes with their own poop (it's a natural deterrent for many dogs). Ensure they have plenty of exercise and mental stimulation to tire them out. Indoors, if they're digging at furniture or carpets, provide appropriate chew toys and supervise them closely, redirecting any digging attempts.
5	I'm worried my dog is digging because they're anxious. What are the signs of digging due to stress, and how can I help them feel more secure?	Digging related to anxiety can be accompanied by other signs like excessive barking, pacing, panting, destructiveness, or clinginess. If you suspect anxiety, increase their exercise, provide a safe den-like space, and consider calming aids like pheromone diffusers or a Thundershirt. Consulting a veterinarian or a certified animal behaviorist is highly recommended for a proper diagnosis and treatment plan.
6	My dog digs when I leave them alone. Is this separation anxiety, and how can I help them cope?	Digging when left alone is a common sign of separation anxiety. To help, desensitize them to your departure cues, practice short absences, provide engaging puzzle toys to distract them while you're gone, and ensure they get enough exercise before you leave. For severe cases, professional guidance from a vet or behaviorist is essential.
7	I want to create a dog-friendly yard that's less appealing for digging. What landscaping ideas can I use?	Consider using ground cover plants that are dense and unappealing to dig in, like creeping thyme or sedum. Mulch with larger, heavier materials like wood chips or gravel. Avoid loose, sandy soil where digging is easy. Create dedicated 'digging zones' with sand or loose soil in an area you don't mind them excavating, and redirect them there.
8	My dog is digging to bury toys or treats. How can I discourage this specific hoarding behavior?	If your dog is burying items, they might be acting on instinct or feel they need to hoard. Try to limit the number of toys or high-value treats available unsupervised. Instead, engage in supervised play and training sessions where they earn the items. If they persist, try burying a toy for them in a designated digging spot to satisfy the instinct in a controlled way, then retrieve it when they're done.
